Zephaniah	Zeph	

Create Your Own Bible Index

Whether you are a new Christian or have a new Bible, you are sure to get caught out trying to find a Book in your Bible. Have you ever been in a Church Service when the Preacher announces a verse from the Bible but doesn't wait for you to find it? Aaahh! It's happened to us all, at some point.

But here is the answer! Create your own Bible Index.

- Simply print out the Bible Booklist – its arranged alphabetically, preferably on white card but paper will be ok just not as durable
- Next grab your Bible and turn to the first couple of Pages and you should find the Table of Contents.
- Now work your way through the list in the Bible, find the corresponding Title on your print-out and write in the page number in the corresponding column space
- Laminate you Index once you have completed it OR place it in a clear plastic cellophane (the sort that covers a greeting card)
- Place in your Bible ready for use!
- Make several copies so that you have a ready reference Book marker for those Bible abbreviations used in Dictionaries, Concordances and Topical Bibles
