

# ~HOW TO CHOOSE A BIBLE STUDY~

The Bible can be broken down into segments and a study applied to each of those segments. On the left hand side of this flow chart are the simpler study methods. On the right are the more complex ones. Each study can be worked independently or used as part of the connected study

To select a Study Method from this flow chart start with the significant verse prompt and decide if you want to pursue a Topic, Theme or Character Study. From the verse look at studying it within the whole chapter before moving on to following through the whole book. Then if it is appropriate within the context of the whole Bible
